WORK EXPERIENCE

Nashville Software School   **August 2019 - February 2020**

6 MONTHS FULL-STACK BOOTCAMP

- **FRONT END CAPSTONE (SAPORI D'ITALIA)**

Built a browser based application utilizing React, React-strap, Javascript, HTML, and CSS called Sapori D'Italia. I created a personal API to return recipes divided by Italian's regions. Then users can save to a personal cookbook session or add new more to the expanding database with full CRUD functionality. The users can also communicate through a messaging session provided by the App.

- **Ghost PAC, group project**

Social media site for PAC-MAN ghosts. It's a dashboard for Inky, Blinky, Pinky, Clyde, and others to use to organize their daily tasks, events, news article, friends, and chat messages. The app was built using the React library, CSS, JSON server, webPack boilerplate and Npm. My role in the group was to take care of the news and task section plus the daily operations of team support.

- **BANGAZON IN A NUTSHELL, group project**

Dashboard for Bangazon employees to use to organize their daily tasks, events, news article. This one page application has been created with vanilla Javascript and runs with webPack and a JSON server API made by the team. My role in the group was to take care of the events and message section plus the daily operations of team support.

- **WELCOME TO NASHVILLE, group project**

Worked with a team to create a tourism application for seniors that want to visit Nashville. Utilized the Eventbrite API to create and itinerary relevant to the client's interests. Built with Javascript, HTML, and CSS.
